

Base compiled by U.S. Geological Survey in 1972 from 1:24,000 quadrangles dated 1945-56. Limited revision from aerial photographs taken 1971. 50,000-foot grid based on Colorado coordinate system, central zone 5000-meter Universal Transverse Mercator grid, zone 13. Metric elevations are shown in parentheses.

EXPLANATION

— TRAIL OR ROAD— Dashed where approximately located; queried where inferred. Plotted from serial photographs, original land plats, or from early maps. Most trail or road names are from original sources such as land plats or from governmental charters. A date (Pre-1861) is generally the date of the original land plat for a particular township, and all trails in that township are earlier than that date.

○ TOWN OR OTHER CULTURAL FEATURE— Approximately located, showing other names used and approximate date of founding or of activity. Some newer towns, especially railroad towns, are not shown. Locations of towns on previous maps vary widely.

— RAILROAD— Abandoned and dismantled. Dashed where grade only; rails not laid. A name in parentheses refers to a railroad that was operated by more than one company. Operating railroads are shown on base. Many abandoned railroads were narrow gage. For more detail about railroads, see Haley, E. J., 1913, Historical railroad map of Colorado, Denver, Colo., Hotchkiss Map Co.

SCALE 1:100,000

1 1/2 2 3 4 5 MILES

5000 10000 15000 20000 25000 FEET

ACKNOWLEDGMENTS

The Western History Department of the Denver Public Library was very helpful in providing maps of the early roads and railroads and accounts of early travelers over the roads. The Bureau of Land Management gave free access to the original land plats. Eril H. Ellis provided additional information about early Colorado roads and towns. The map was reviewed by E. J. Haley, U.S. Bureau of Reclamation, who provided additional information, and by Merrill J. Mattes, U.S. National Park Service.
